

Exporting?

Exports from the United States are a **\$2 trillion** a year business! For fresh produce suppliers with perishable products and rapidly fluctuating markets, the stakes are that much higher.

PrimusLabs is here to help you streamline your processes to get your products tested, data transferred, and products on their way to countries around the world.

Results You Need When You Need Them

With unpredictability and wild price fluctuations, time is a critical factor. Exporters need reliable test results, now. With PrimusLabs get your results within 24-48 hours.

Keep Your Operation Moving

Know when to harvest and be prepared for market shifts with daily tolerance updates for **42 countries, 52 commodities, and over 350 compounds**, get the information to get your product to its destination!

Tap Into Opportunity

All your lab result data is automatically available within the Azzule platform connecting you to a network of over 15,000 growers, shippers, and retailers. Seamlessly transfer your data through the supply chain and gain compliance.

Avoid Delays At The Border

Time is of the essence if your product is detained. A third-party laboratory can free up resources and expedite the process for importers with detained perishables. We offer a comprehensive FDA (DWPE) testing program.

"Food safety is a big enough job ... Our whole goal is to streamline your testing experience."

- PrimusLabs Chemist

Learn more about MRLs

A **maximum residue limit (MRL)** is the highest level of pesticide residue that is legally tolerated in or on food when pesticides are applied correctly in accordance with Good Agricultural Practice.

The USDA Foreign Agricultural Services departments developed a database containing maximum acceptable levels of pesticides and veterinary drugs in food and agricultural products in the United States, as well as 70 other countries, the European Union, and the Codex Alimentarius Commission.

Find the Best Screen for Your Exports

Whether you are exporting your product around the world or next door to Canada we have a screen to fit your program.

MRS Extended +

Our most extensive screen is perfect for any exporter, covering all the compounds in the MRS, plus more! Multi-Residue Limits (MRLs) can be added to any screen giving confidence when sending your products around the globe.

[Download the Screen List Here](#)

Organic

We offer 100% coverage of the National Organic Program (NOP) prohibited compound list in both USA and Mexico laboratories.
