Maintain an organized and up-to-date database of foreign suppliers, including contact information, location, and product information. House your information within the [Azzule platform!](#)

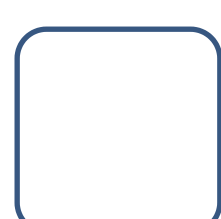

Microbiological and Pesticide Residue Results

**Ask about this [Primuslabs offered service](#)*

Verify imported products' food safety compliance with microbiological testing. Depending on your commodities, these could also be a great addition within your FSVP plan. Consider [PrimusLabs](#) for import alert services!

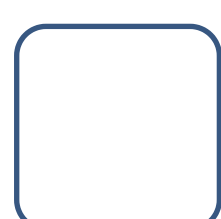

Hazard Analysis

Conduct a thorough hazard analysis for each imported product. Read more about Hazard Analyses [here](#), or access [Azzule CORE's tutorial](#).

Corrective Actions

Develop a systematic approach for addressing non-compliance issues. [Learn more](#) about corrective action plans on the FDA's website, or access Azzule CORE's tutorial [here](#).

Evaluation Form

Create an evaluation form to assess your foreign suppliers' compliance with food safety standards. This form ensures consistent and objective evaluation of each supplier's performance.
